

Intake Date allows a future date

Issue: Intake allows for a future date.

Steps to reproduce:

1)

The screenshot displays the 'Idaho-WITS Training' web application interface. The top navigation bar includes the WITS logo, the title 'Idaho-WITS Training', and a 'Logout' button. Below this, a user header shows 'User: Willingham, Robert L., WA' and 'Location: DHW Contractor, Central Office'. A secondary bar indicates the current client: 'Client: Testing, 18.2.11 SUD | 204081750000304 | 1' with a 'Clear Client' button. The left sidebar contains a menu with options like 'Home Page', 'Agency Contacts', 'Agency', 'Group List', 'Clinical Dashboard', and 'Client List'. The main content area is titled 'Intake Case Information' and contains various dropdown menus and text fields. A red arrow points to the 'Intake Date' field, which is set to '3/6/2016'. Other fields include 'Intake Facility' (Central Office), 'Intake Staff' (Willingham, Robert L., WA), 'Initial Contact' (Appointment), 'County of Res.' (ADA), 'Source of Referral' (Alcohol/Drug Use Program), 'Case # 1', 'Case Status' (Open Active), 'Date of First Contact' (2/1/2016), 'Pregnant' (Yes), 'Due Date' (6/1/2016), 'Priority Population' (IDHW), 'HIV Tested?' (Yes), 'Past IV Drug Use' (Denies), 'Is client under court supervision?' (Yes), 'Supervising County' (ADA), and 'Presenting Problem (In Client's Own Words)' (18.2.11 Presenting Problem). At the bottom, there are sections for 'Inter-Agency Service' and 'Inter-Agency Service Selected'.

Workaround: Ensure that date entered is correct per situation.
